[linkedin.com/naveen-kumar-n-165864208](https://www.linkedin.com/in/naveen-kumar-n-165864208)

TECHNICAL SKILLS

- **Cloud Service**
OpenStack (Private Cloud), AWS
- **Operating System**
Linux (Red Hat)
- **Networking**
Cisco ACI, APIC, Static Port Binding
- **Automation**
Bash Scripting, Cron Jobs
- **Monitoring**
Dynatrace, Splunk, Panorama, AVI (NXS ALB), Netops
- **ITSM & Collaboration**
ServiceNow (Incident/Change/Problem), RCAs
- **Storage & Hardware**
Ceph Storage, NFS, LVM, HP/Dell Servers, BIOS
Firmware update, iDRAC
- **Tools**
Git, Netbox, Targetprocess, MS Excel

INTERESTS

- **DevOps & Kubernetes (Learning)**
- **Site Reliability Engineering (SRE)**
- **Generative AI**
- **OpenShift**
- **UiPath RPA**

AWARDS

- **2Good**
Award for distinguished performance for two consecutive years at HCLTech.
- **Microsoft North Star 2025**
Issued by Microsoft - Associated with HCLTech
- **Microsoft North Star 2024**
Issued by Microsoft - Associated with HCLTech

SUMMARY

Telco Cloud Operations Engineer with 2.5+ years of experience in OpenStack, Linux, and telecom cloud environments. Proven track record of managing 2,000+ VM migrations with zero downtime, optimizing cluster performance, and resolving production incidents. Skilled in automation, cloud operations, and high-availability infrastructure.

EXPERIENCE

- **HCLTech – Client: Proximus** Madurai, Tamil Nadu
Telco Cloud Administrator September 2023 - Present
- **HDLC Technologies** Chennai, Tamil Nadu
AWS Cloud - Intern June 2023 - August 2023 (3 Months)
- **FIXWATT** Madurai, Tamil Nadu
Data Analyst - Freelance March 2022 – May 2023 (1 Year 3 Months)

ROLES AND RESPONSIBILITIES

- HCLTech**
 - Spearheaded migration of 2,000+ VMs with zero downtime, ensuring uninterrupted telecom operations.
 - Executed scale-in (40+ nodes) and scale-out (20+ nodes), improving cluster efficiency by ~20%
 - Managed 100+ OpenStack resources (images, flavors, quotas), reducing provisioning time by 30%
 - Implemented static port binding across tenant networks, improving deployment accuracy and reducing misconfigurations by 25%
 - Monitored ACI fabric (Leaf/Spine) and resolved network issues, achieving 99.9% uptime
 - Solved 50+ incidents/month using Linux & OpenStack CLI, improving SLA compliance by 35%
 - Automated routine tasks using cron & bash scripting, reducing manual effort by 20%
 - Supported volume lifecycle operations for 500+ instances, ensuring data reliability and performance
 - Diagnosed hardware issues on HP/Dell servers and partnered with cross-functional teams (Cisco, Broadcom) to address critical production incidents
 - Reduced critical incidents by 40% through proactive monitoring and daily health checks while supporting a 24/7 high-availability telecom production environment
 - Performed firmware upgrades (BIOS/iDRAC) on 50+ servers, enhancing system stability
 - Participated in cluster upgrade activities, including pre-upgrade, post-upgrade, and rollback planning

CERTIFICATIONS

- **AWS Solutions Architect - Amazon Web Services**
- **Microsoft Azure Administrator Associate**
- **Red Hat OpenStack Administration**
- **AWS Cloud Practitioner**
- **Microsoft Azure Artificial Intelligence Fundamentals**
- **Oracle Cloud Infrastructure & AI Associate**
- **ITIL®4**
- **Cloud Computing - IIT Kharagpur**

EDUCATION

- K.L.N College of Engineering** Aug 2019 - May 2023
Bachelor of Engineering - Electronics and Communication, CGPA: 8.82
